400030 REV C

Material: Polycarbonate

Flammability: Class B1

Maintenance:

The easiest and safest way to clean polycarbonate is with a mild soap, such as dish washing liquid, and a non-abrasive cloth or sponge. Work from the top down to minimize any drips that may run over the finished areas. Avoid using ammonia or alcohol-based products such as Windex or Lysol as they may etch the surface or coating of the panels.

Polycarbonate collection is available in:
