

Portable Folding Coat Rack

Assembly Instructions

Tools and hardware included:

Small Bolts

Small Nuts

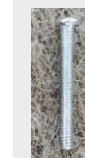

Medium Bolts

Large Bolts

Large Nuts

Hook Screws

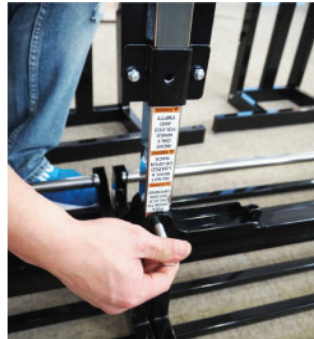

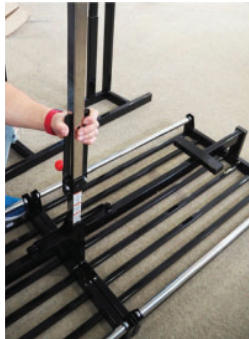

Hook Nuts

1.

Lay the two top pieces on the ground next to each other and then slide them into each other.

2.

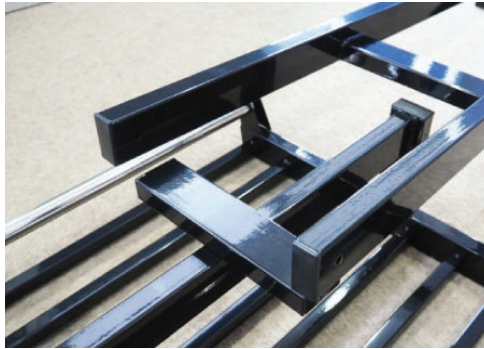

Place the pole into the middle of the top pieces and screw it in.

3.

Nest, screw in both sides of the top piece.

4.

After the pole is secured, lay the two black bars on each side of the top. Line up the top with the bar on each side.

5.

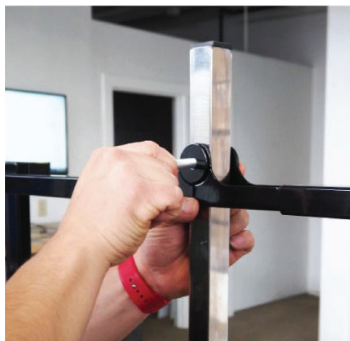

Next, screw the bars into the top on each side.

6.

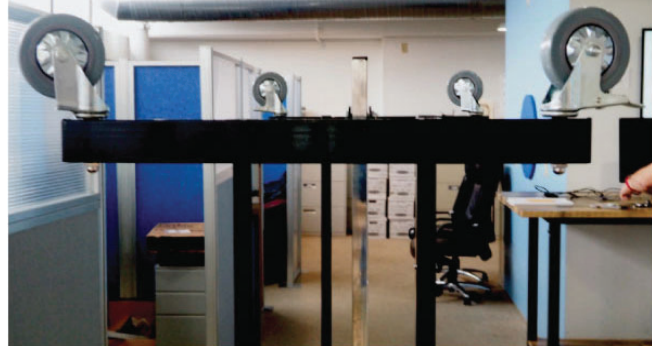

After both sides are screwed in, bring each bar to the top of the middle pole.

7.

Screw in the bars to the middle pole.

8.

Next, screw in the wheels. The two wheels with brakes go on opposite side diagonally from each other.

9.

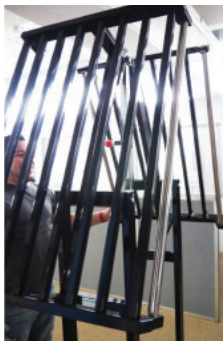

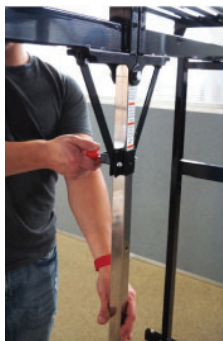

Turn the coat rack right side up. The coat rack frame is finished.

10.

To add the sliding hooks, use the hook screws and nuts provided to secure them to the black horizontal post.

11.

To fold the coat rack, pull the red lever and push down the two sides. Lock it at the bottom.
