VERSARE

Premium Room Divider Features

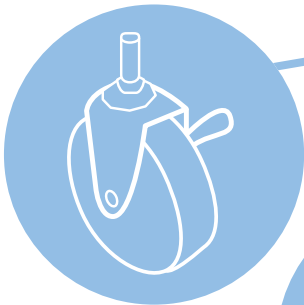

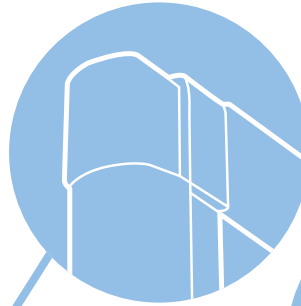

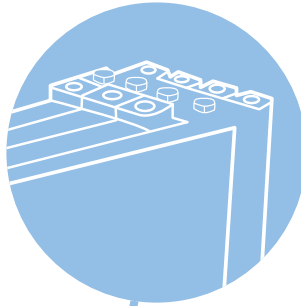

Exclusive telescoping hinge option keeps all panels in a straight line regardless of length

Patented 360° rotating hinge option provides a full range of movement and unparalleled versatility

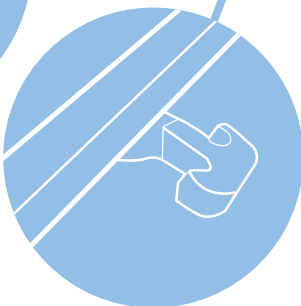

Our aircraft aluminum frames are durable, lightweight, and safer than steel dividers

Patented full-sized end panels increase stability and eliminate tripping hazards

Frames accommodate hooks for displaying artwork or dry erase boards

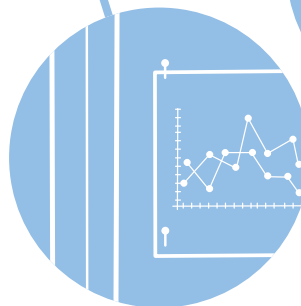

Double-locking wheels on each end panel can be quickly activated for stationary use

Transport lock connects all collapsed panels for quick & easy transport

Curved edges prevent pinch points when arranging panels

Acoustical fabric panel options accept pushpins for posting artwork or signage

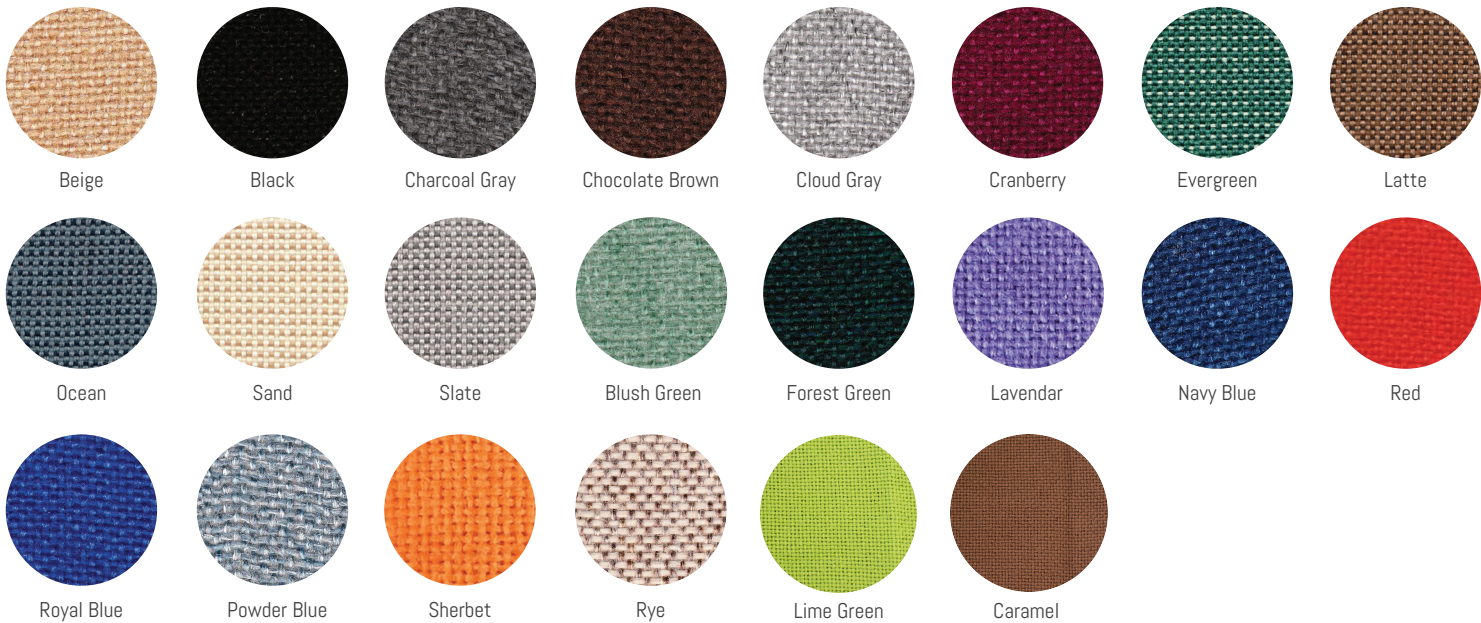

Link multiple units together with attached unit-to-unit Velcro connectors

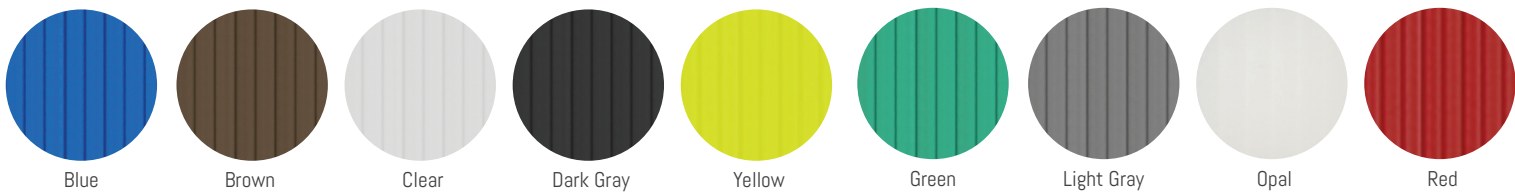

FABRIC

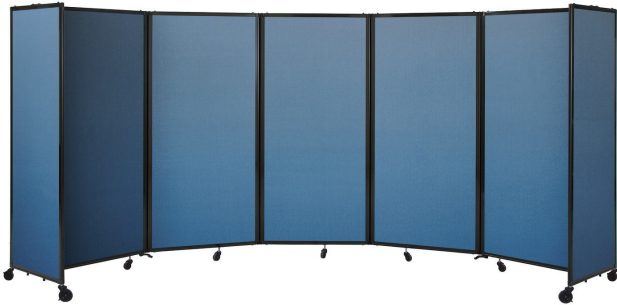

Acoustical fabric is our most popular panel material option. This pushpin-accepting fabric is perfect for dampening sound and controlling excess room noise. Our acoustical fabric panels are rated at 0.65 NRC and come in a variety of colors to match your space.

POLYCARBONATE

Enjoy modern style and rugged durability with our polycarbonate plastic panels. Available in several colors and opacities, these spray-cleanable panels can withstand water, shock, and sunlight with ease.

ROOM DIVIDER 360

Our flagship partition will provide you with unprecedented arrangement versatility thanks to range of exclusive features. This portable folding divider uses our patented 360° rotating hinges to provide a full range of movement per panel. Each panel can bend a full 360°, unlike many outdated partitions featuring limiting piano hinge designs that restrict movement. The Room Divider 360 will allow you to create anything from straight lines to circular shapes. Link multiple units with the attached Velcro straps and get creative with your situation!

Low-profile casters and full-sized end panels provide greater stability, safety, and acoustical control than spring-loaded wheels and awkward railings found elsewhere on the market. The Room Divider 360 can even be custom printed with your own branding, mascots, or artwork across the fabric panels. We're confident the Room Divider 360 offers the most versatility and will be your do-it-all divider for any situation.

Widths				
8'6"	14'0"	19'6"	25'0"	30'6"*
Heights

* Wall-Mounted version

STRAIGHTWALL

Slide it out! Our StraightWall offers most of the same benefits as our flagship Room Divider 360, but with our exclusive sliding hinges. This unique telescoping hinge design keeps each panel in a straight line at all times, allowing the panels to be quickly and easily opened and close in an orderly fashion. The smooth, sturdy hinge movement provides an ease of use and level of fun not found on any other room divider, and most importantly, offers increased space consolidation, since the panels only move in one direction.

Link multiple units with the attached Velcro straps to create portable walls and sliding doors – the StraightWall makes a nice alternative to accordion doors or track-mounted partition systems. Space-saving and incredibly quick to use, the StraightWall is your go-to guy if efficiency is your top priority.

OPERABLE WALL

Folding

Sliding

Got a lotta space? Our Operable Wall covers a massive range and is perfect for dividing open areas with tall ceilings. With heights available up to 12', this XL room divider offers an affordable alternative to expensive track-mounted accordion door systems, which often involve building permits due to restricting air circulation. The Operable Wall leaves space between the divider and the ceiling, encouraging air circulation. The entire unit folds and collapses flush against the wall when not in use.

Folding

Height	Width			
	7'8"	11'6"	15'4"	19'2"
up to 12'				

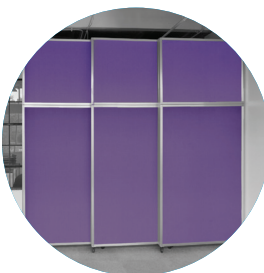

This folding divider is available in widths up to 19'2", or by mounting two units to opposing walls, this system can divide spaces up to 39'. Despite its massive size, the Operable Wall is easy to open and close.

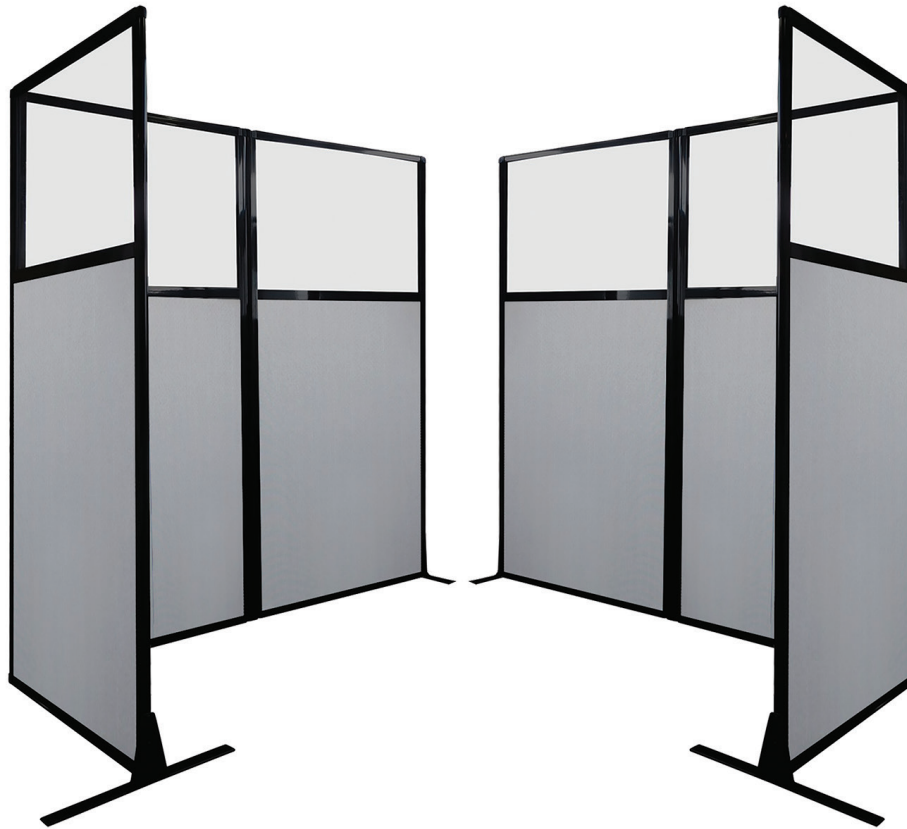

We additionally offer a sliding version of the Operable Wall. This version uses our special telescoping hinges to keep the panels in a straight line regardless of length. With widths available up to 15'7", units can be mounted on multiple walls to create sliding doors with more coverage. Perfect for smaller areas with high ceilings, the Operable Wall (Sliding) will maximize your space efficiency.

WORK STATION SCREENS

Our Work Station Screens are lightweight, portable privacy screens available in 1, 2, or 3-Panel configurations. These popular partitions can be used to create and organize private working areas, be used as a free standing partition to separate desks, or simply enhance and enclose an existing workstation. Each configuration is self-supported, with no additional hardware required, so there's no need to attach to a wall or support between desks. Built-in acrylic windows provide visibility. The flexibility of this system allows you to mix and match various configurations to meet your specific need, or simply add more units in the future as your work area grows.

QUICK-WALL

Folding

Sliding

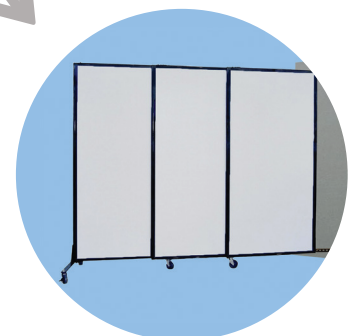

Creating an instant partition wall is a breeze with our Quick-Walls. Available in a variety of configurations, these affordable room dividers include many of our top-of-the-line features, such as sound-dampening acoustical fiberglass panels, lightweight aluminum frame construction, and our 3-year warranty. Quick-Walls have an elegant extruded aluminum frame which makes them strong yet lightweight.

The Folding version features our patented 360° hinge, providing unparalleled versatility in arrangement. The Sliding version uses our space-maximizing telescoping hinges, ensuring panels fold out in a straight line at all times. Each version is available in portable or wall-mounted configurations.

The acoustical fabric panels are also fully-tackable, making these popular portable art walls for schools or portable signage displays for designated areas. We alternately offer polycarbonate plastic or stylish woodgrain laminate panel options, which are both spray-cleanable and super stylish.

WALL-MOUNTED OPTIONS AVAILABLE

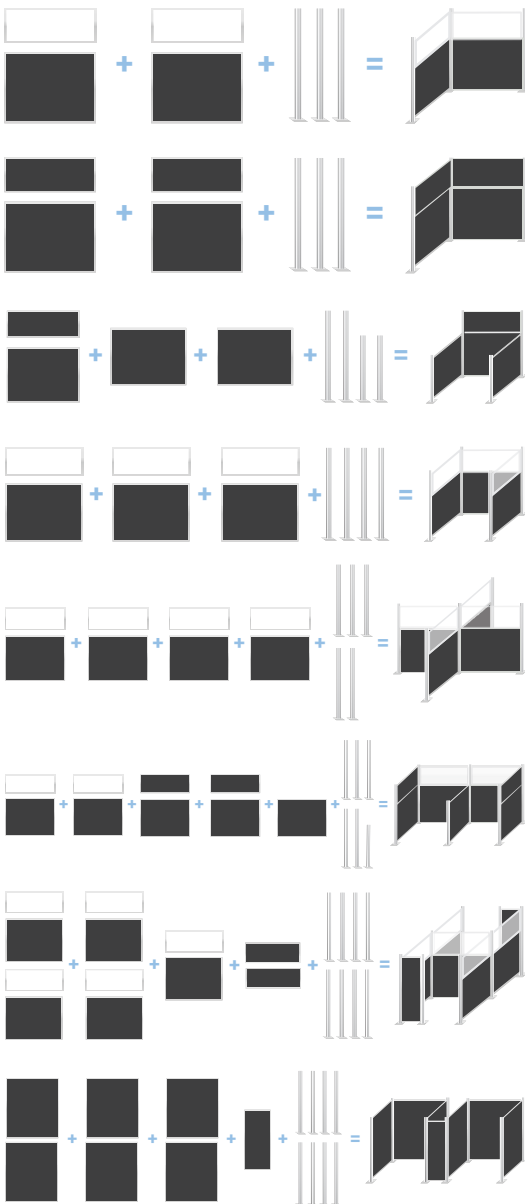

HUSH PANELS

DIY Cubicle Partitions

Cubicle creation has never been more customizable and affordable! Our innovative Hush Panels system allows you to construct cubicle areas quickly and without tools. Simply slide the desired posts, panels, and optional windows together to create individual or group work stations. Create a unique configuration and build upon it in the future – arrangements can easily be expanded to grow along with your organization! The stylish, 2" thick partition panels are both durable and lightweight, while the anodized aluminum frame and post construction will provide a modern aesthetic to your work environment. Check out some of our recommended configurations to get some ideas – with the Hush Panels system, you're only limited by your imagination!

HUSH SCREEN

Our sleek and modern Hush Screen is a perfect solution for creating impromptu cubicles or work stations against a wall. The Hush Screen features a silver aluminum frame construction that is as durable as it is stylish. The partition's width is 2" thick, allowing for maximum privacy and sound dampening with its acoustical fiberglass panels. A wheeled option with locking casters is also available. The Hush Screen's caster design allows it to sit flush against a flat surface, making it ideal for turning any wall into a number of impromptu cubicles.

DIVIDEWRITE MOBILE WHITEBOARD

Partition off space or take your notes on the go with the DivideWrite. With a height of 6', this portable dry erase board is available in three widths. The whiteboard section is double-sided and magnetic, providing a range of usage options. The lower modesty panel can be customized with a variety of our Acoustical Fabric or Woodgrain Laminate options to fit in with your office or work environment. Featuring a robust 2" thick construction and anodized aluminum frame, the DivideWrite can be wheeled in to add a modern aesthetic to just about any area.

TABLETOP DISPLAY

This little guy packs a punch! Our Tabletop Display is a high-quality portable tabletop partition that helps you professionally display tradeshow and other literature. Using the same construction as our flagship Room Divider 360, this three-panel partition can help you create instant desktop study or testing areas. The pushpin-accepting fabric panels allow literature to be posted for trade shows and exhibitions.

	24"	36"
78"		
99"		

THE PRIVACY SCREEN

Simple and efficient, The Privacy Screen is a three-panel folding privacy screen. Boasting our patented 360° hinges, this portable partition will find usage in a variety of applications ranging from nursing stations, vaccination booths, small break areas, meeting rooms, testing stations, or quiet rest zones. Choose the pushpin-accepting Acoustical Fabric option to create a portable art board. The panels may be easily folded into a zig-zag or L-shape, and the aluminum frame design ensures panels will not rub against each other when closed, allowing attached artwork to be transported without being removed.

Width	Heights		
	5'10"	6'8"	7'4"
7'6"			

VERSIFOLD

Our VersiFold is a folding acoustical divider that dampens sound as it separates space. Each partition panel uses soft, pushpin-accepting, acoustical ribbed fabric surface over a heavy foam core. Set up the VersiFold in a zig-zag pattern, or combine with our optional VersiFoot steel feet to create either "L" or "C" shapes. Unlike other room dividers, these acoustical partitions meet the floor directly from end to end, keeping sound confined from other areas

Width	Height
8'0"	6'6"

VERSIPANEL

Create interesting shapes while dampening sound with the VersiPanel. The ribbed acoustical fabric and heavy foam core ensure sound-dampening, while the unique multi-panel design allows the VersiPanel to be set up in a serpentine "S" shape. Add a couple of our optional VersiFoot attachments to gain greater arrangement flexibility, such as creating "C" or "L" shapes. This soft and durable divider is perfect for creating sound booths or testing areas. Connect several units with the built-in rare earth magnets. The VersiPanel can be rolled up for easy storage.

Width	Height
8'0"	6'6"

VERSIPANEL JR

This mini version of our popular VersiPanel is perfect for youth-oriented environments. The VersiPanel Jr. is designed to be positioned in a serpentine shape, but with two VersiFoot attachments (sold separately), "C" or "L" shapes may also be created. Built-in magnetic ends allow multiple units to be linked together, while the pushpin-accepting fabric allows artwork to be displayed. Roll up the VersiPanel Jr for easy transport or storage.

Width	Height
8'0"	4'0"

Canvas Partition Features

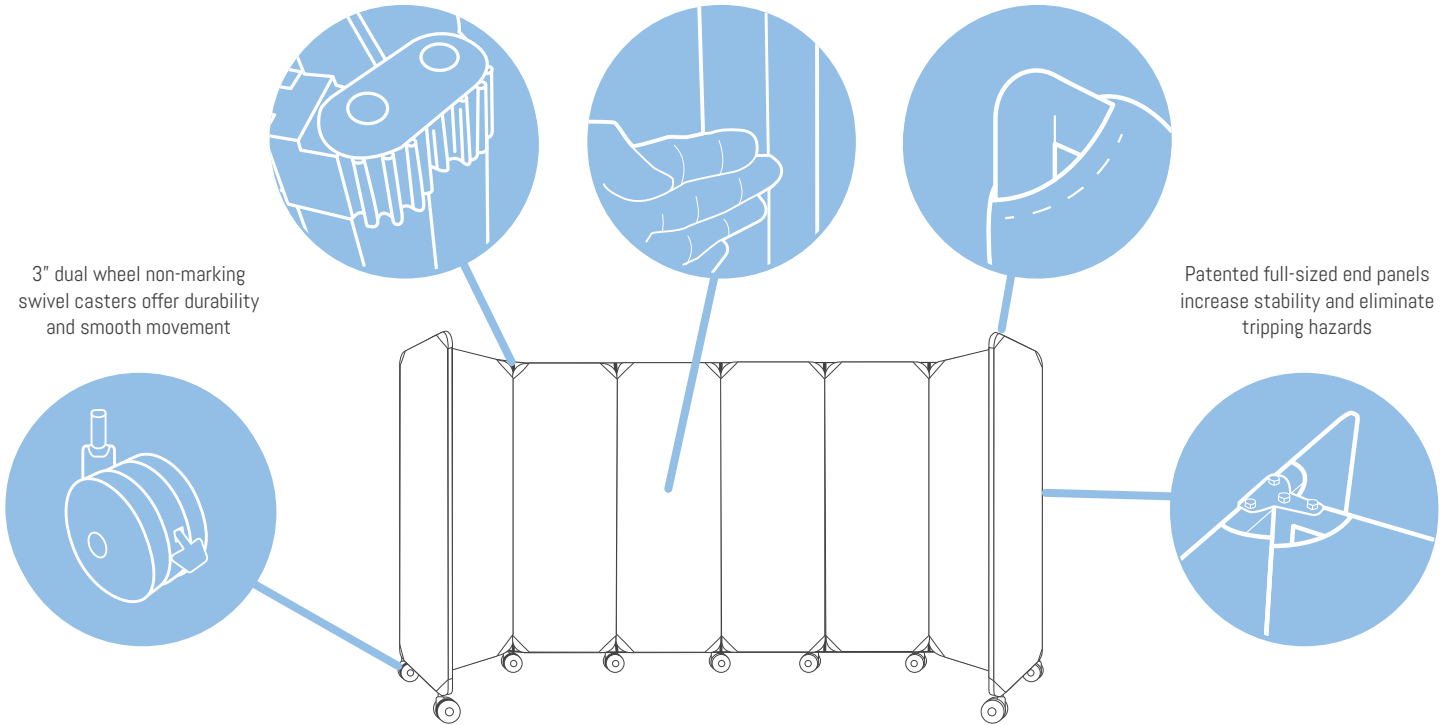

Patented 360° rotating hinge option provides a full range of movement and unparalleled versatility

Flame-retardant 100% cotton canvas panels are durable and replaceable

16-gauge 1.25" round steel tubing enhances stability, while rounded plastic corners ensure safety

3" dual wheel non-marking swivel casters offer durability and smooth movement

Patented full-sized end panels increase stability and eliminate tripping hazards

MP10 ROOM DIVIDER

The MP10 is our most popular portable partition for penny-pinchers, as it features the same patented 360° rotating hinges and full-sized end panels as our flagship Room Divider 360. Dividing large areas, such as classrooms or auditoriums, has never been easier!

Each panel uses our patented 360° rotating hinges to allow a wealth of arrangement opportunities, from "L" and "C" shapes to perfectly straight lines. The combination of lightweight fabric with a sturdy frame makes this portable partition a popular room divider for schools, classrooms, and libraries due to its ease of use and relatively small profile (4 sq ft) when collapsed.

Width	Heights		
	4'0"	6'0"	6'10"
10'0"			

FP6 FOLDING PRIVACY SCREEN

The FP6 is a three-panel partition that utilizes our patented 360° rotating hinge technology. This allows each panel to be folded in any direction, providing more flexibility in arrangement. Create zig-zag or L-shapes with this lightweight and affordable privacy screen. The durable steel and plastic frame is tough enough to stand on its own while remaining lightweight enough to be easily collapsed and transported.

Height	Width
6'0"	6'0"

VP6 MOBILE PARTITION

The VP6 is a large 6' by 6' portable canvas partition that can be quickly wheeled in for instant privacy anywhere. The lightweight, durable canvas provides an unparalleled ease of use, while the 6x6 dimensions will cover a wide range of applications. These portable privacy screens are popular choices for inserting between cubicles or for creating impromptu testing areas in classrooms.

Width	Height
6'0"	6'0"

VP4 TWO-POSITION PARTITION

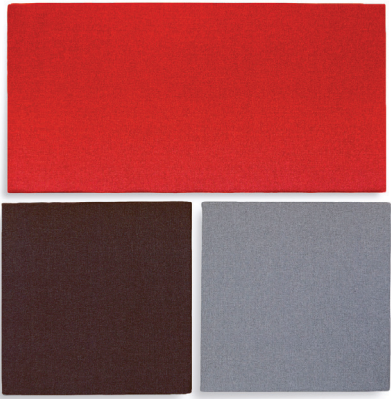

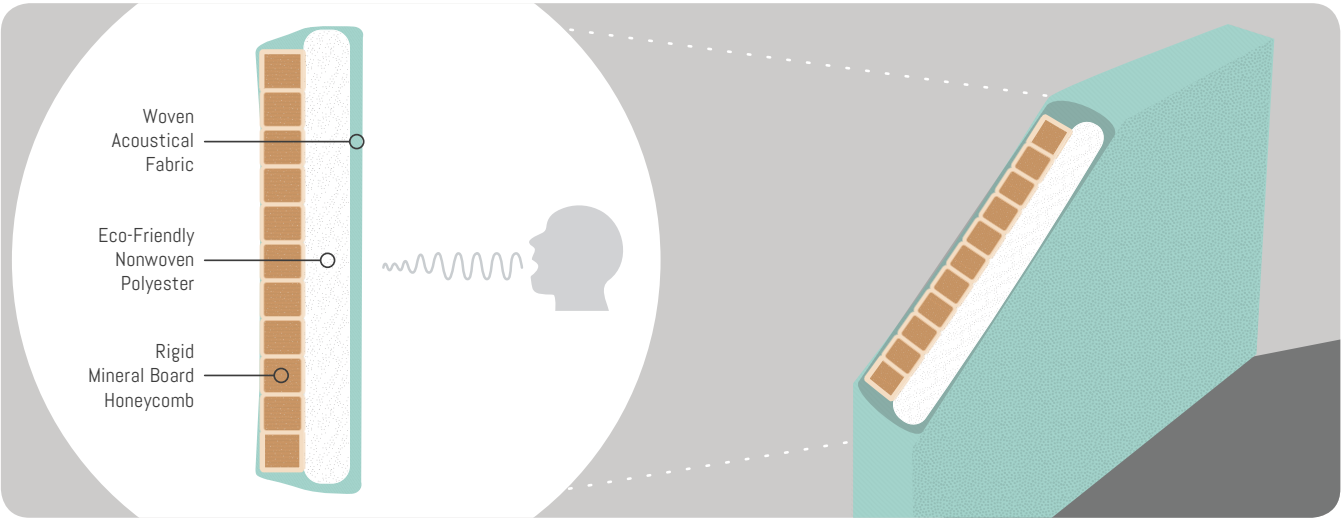

Need instant privacy anywhere? The VP4 is a portable canvas partition that can section off space just about anywhere. Measuring 4' long and 6' high, this partition can be rotated to cover 6' long and 4' high. The canvas partition panel is both durable and lightweight, making this partition easy to store.

Height	Width
6'0"	3'0"

Acoustic Panel Features

Our acoustic panels use 100% recyclable nonwoven polyester, which is more environmentally friendly than toxic fiberglass foam, and just as effective at breaking down sound. A honeycomb core acts as a sound trap.

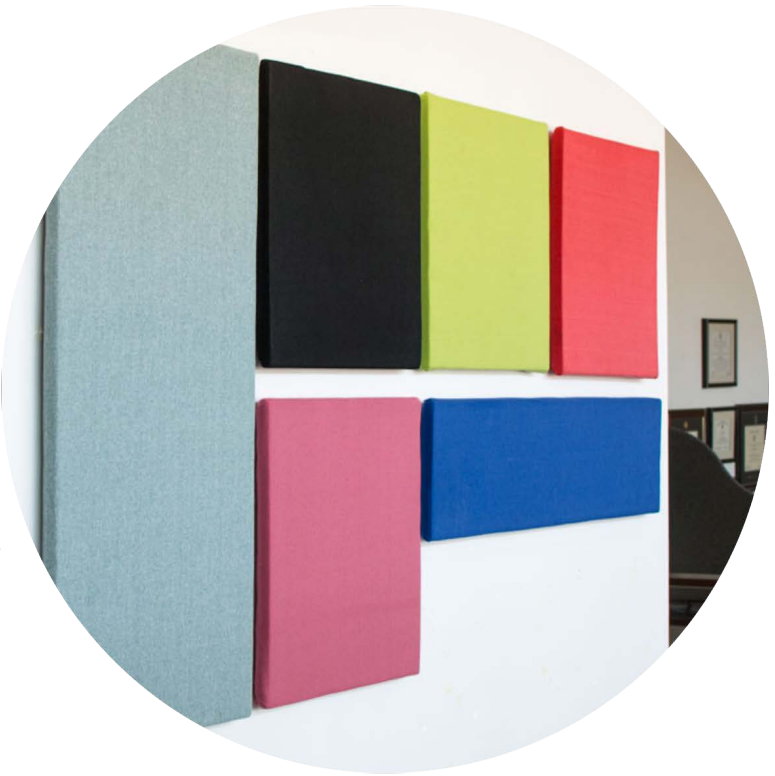

Height	Width	
	1'0"	2'0"
2'0"		
4'0"		

SOUND STONES (WALL)

Dampen room sound with style. Available in any of our premium Acoustical Fabric colors, these lightweight, wall-mounted sound panels will add a unique design aesthetic while cutting down room echoes. Perfect for large offices or hallways, each Sound Stone (Wall) comes equipped with durable, adhesive foam strips for easy and safe installation.

SOUND STONES (CEILING)

Our ceiling-mounted Sound Stones dangle gracefully from your ceiling and dampen excess room noise. These colorful, ultra-affordable sound panels will provide an attractive and modern look to any location. The hanging flag configuration provides a modern aesthetic to any room! Choose from vertical or horizontal eye hooks to accommodate your preferred method for mounting.

THE MONOLITH

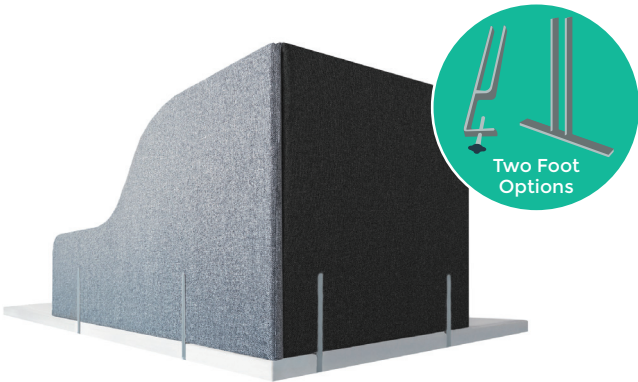

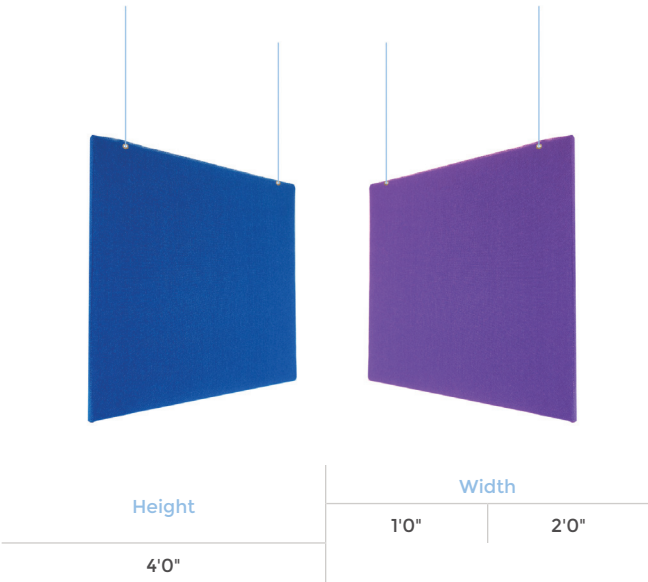

Control room acoustics quickly, affordably, and stylishly with The Monolith. These portable, freestanding acoustic panels are designed to control sound and dampen room reverberations. Use The Monolith as a partition between cubicles to cut down unwanted sound, or place multiple units by doors or corners to dampen room echo.

WORK FORTS DESKTOP PRIVACY PANELS

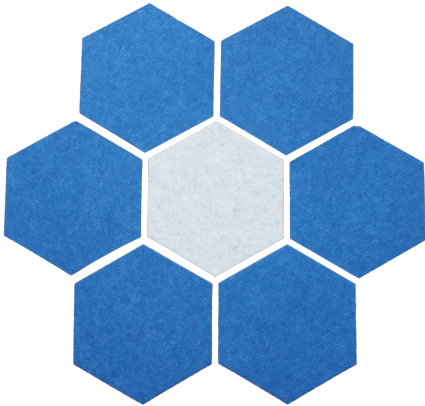

Need a little desktop privacy in your cubicle or workstation? Our Work Forts are acoustical privacy panels that attach to your desk or tabletop. Choose from over twenty fabric colors and a variety of sizes to suit your desk space divinely. Add privacy to your workspace — no more creepy coworkers!

SoundSorb Acoustic Panels

We are proud to introduce our new SoundSorb Wall-Mounted Acoustic Panels. With unique shapes and sizes, you can now control excess room noise while creating a visually appealing design. Perfect for board rooms, offices, studios, theaters, schools and more, these acoustical panels will stay out of your way while minimizing excess noise. With multiple colors, shapes and sizes, these effective and light weight acoustical panels will provide an attractive and modern look to your space.

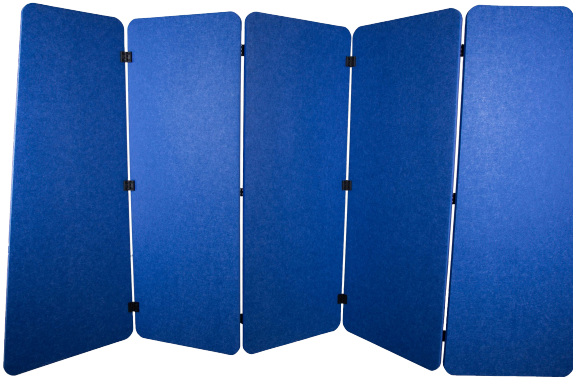

Height		Width

Circle	Triangle	Circle	Triangle
Hexagon		Hexagon	

SoundSorb VersiPanel

If sound-dampening is a priority, our new SoundSorb Acoustical Partition Wall is a great place to start. This portable partition wall is constructed with high-density rigid polyester. Available in four stylish colors, the SoundSorb Acoustical Partition Wall is a popular studio partition or office divider due to its superior sound-dampening capabilities and attractive looks. Unlike other partition walls, this one meets the floor directly from end to end, keeping sound confined.

The SoundSorb Acoustical Partition Wall can be easily folded flat for easy storage.

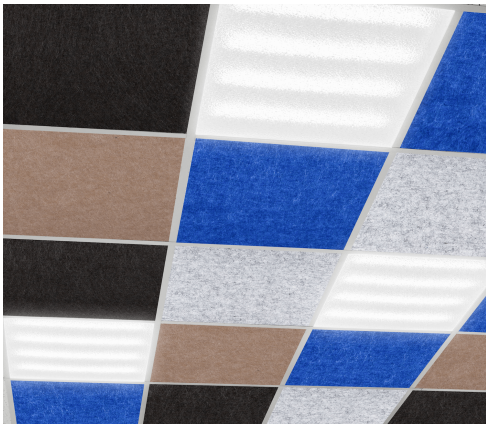

Height	Width	
5'	6'0"	10'

SoundSorb Ceiling Tiles

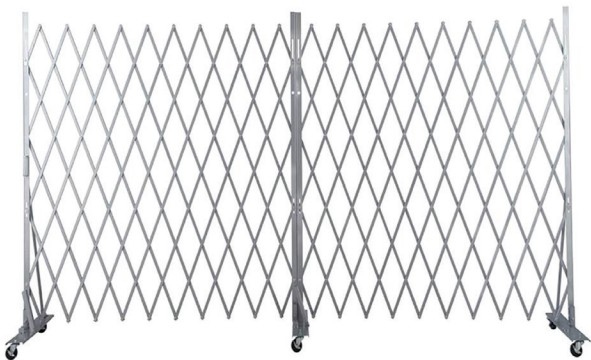

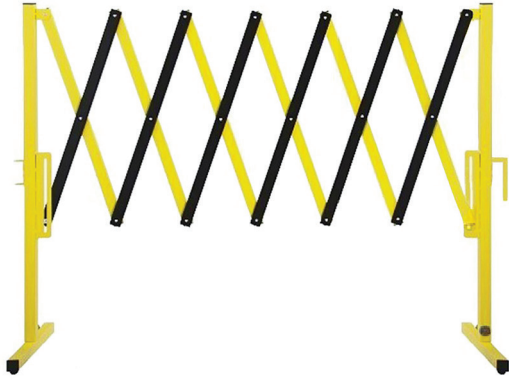

Our new SoundSorb Acoustic Ceiling Tiles are perfect for both residential and commercial spaces, these acoustic ceiling tiles will allow you to easily and affordably achieve NRC values of .95. With multiple colors and sizes, these effective and light weight ceiling tiles will provide an attractive and modern look to your space.

Available in both 2'x2' and 2'x4' sizes, our SoundSorb Ceiling Tiles are designed to be installed in a standard drop ceiling grid

Height	Width	
2'0"	2'0"	4'0"

FOLDING SECURITY FENCES

The Protector / Block-N-Roll

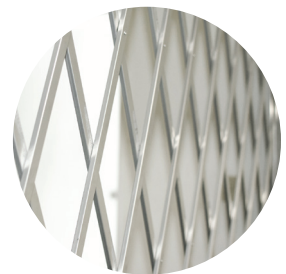

Our collapsing barricades are the ultimate in portable security! The brightly-colored powdercoat steel is durable and lightweight, making setup a cinch. The Protector expands up to 11 ft, while the Block-N-Roll doubles the range to a whopping 22 ft of coverage.

LOCK-N-BLOCK

Secure your premises with the Lock-N-Block. This wall-mounted fence is available in a variety of sizes and can be quickly collapsed, expanded, and locked up tight. This portable security gate is available in silver, black, or yellow/black industrial powdercoat, providing maximum durability with an elegant and professional look.

THE UNDERCOVER PORTABLE SHELTER

Rain or shine, this affordable carport will protect your investment every time! House your cars, ATVs, tractors, boats, and more! This high-quality shelter is available in a variety of widths and lengths to accommodate your outdoor area. A breeze to setup, the UnderCover is also perfect for commercial use, such as housing lumber or propane tanks.

Under Cover Dimensions	Width	Length	Height
Mini	8'	5'	6' (peak:86")
Single	8'	10'	6' (peak:86")
Double	12'	10'	6' (peak:93")
Double XL	12'	20'	6' (peak:93")
Jumbo	16'	15'	6' (peak:101")
Jumbo XL	16'	25'	6' (peak:101")
