DIVIDE AND CONQUER!

Looking for a do-it-all divider to cover a variety of situations? The Room Divider 360° offers unparalleled arrangement versatility thanks to our industry leading 360° rotating hinges which provide full-range, no-pinch movement for every panel. This allows you to create a variety of setup options, such as C-shapes, L-shapes, or straight lines. Link multiple units together with the attached Velcro connectors and you'll only be limited by your imagination!

It's no wonder the Room Divider 360° is our most popular choice for dividing space. Our lightweight, aircraft aluminum frame construction provides greater portability and security than heavy, outdated steel dividers. Low-profile casters and full-sized end panels provide greater stability, safety, and acoustical control than spring-loaded wheels and awkward railings found elsewhere on the market.

We take pride in our engineering and are confident we offer the best build quality at the best price. The Room Divider 360° can be completely customized to perfectly fit your environment. Choose from over 20 colors in our pushpin-accepting fabric to add a touch of class to any location. Our polycarbonate panel options are cleanable and available in 9 colors and with varying translucencies. With our SoundSorb option get enhanced sound-dampening and acoustical control in a recycled material that produces zero water waste in production and zero VOCs once it's in your home.
