SPACE-SAVING...SIMPLIFIED.

Everyone appreciates a straight shooter. Maybe that's the reason the StraightWall is one of our most popular partitions. Featuring unique, telescoping hinges, this room divider maintains a perfectly straight line regardless of length. The smooth, sturdy hinge movement provides an ease of use not found on any other partition. The StraightWall's lightweight, aircraft aluminum frame stands apart from heavy, wobbly steel dividers found elsewhere on the market. Low-profile casters and full-sized end panels provide superior stability and safety than spring-loaded wheels and awkward railings found on rivals' partitions. We take pride in our engineering and are confident we offer a superior build quality at a lower price. Customize the StraightWall to seamlessly integrate with your environment! Choose from over 20 unique colors in pushpin-accepting fabric or try our SoundSorb recycled, felted acoustical material to dampen sound and control acoustics. Want a really unique look that can be quickly spray-cleaned? Our polycarbonate plastic panels are available in several colors and translucencies, while our woodgrain laminate options will add a touch of class to any location.
