

Ballistic Protection Explained **WHAT THE NIJ LEVELS MEAN**

Handgun-Rated Protection **NIJ LEVEL IIIA**

1. DESIGNED TO RESIST POWERFUL HANDGUN ROUNDS

Testing includes .357 Magnum, .44 Magnum, and 9mm FMJ threats.

2. TESTED FOR RESISTANCE TO PROJECTILE PENETRATION

Evaluated under controlled laboratory conditions.
Please note: Bullet-resistant does not mean “bulletproof.”

3. NOT RATED FOR RIFLE THREATS

Rifle gun threats require a higher ballistic rating.

AVAILABLE NIJ LEVEL IIIA PRODUCTS

- ShieldWall® Bullet-Resistant Portable Shield Partition
- ShieldWrite® Bullet-Resistant Mobile Whiteboard
- ShieldWrite® Full-Length Bullet-Resistant Mobile Whiteboard

Rifle-Rated Protection **NIJ LEVEL III**

1. DESIGNED TO RESIST POWERFUL RIFLE ROUNDS

Testing includes 7.62 × 51 mm NATO M80 ball full-metal-jacketed ammunition with a 149-grain projectile.

2. PROVIDES A HIGHER THREAT RATING

Designed to resist greater projectile energy than Level IIIA handgun-rated protection.

Please note: Bullet-resistant does not mean “bulletproof.”

3. NOT RATED FOR EVERY RIFLE ROUND

Level III does not automatically protect against armor-piercing ammunition or every type of rifle threat.

AVAILABLE NIJ LEVEL III PRODUCTS

- ShieldWrite® Bullet-Resistant Mobile Whiteboard
