

OPERABLE WALL

LARGE SIZE, LOW PRICE

Our Operable Walls provide an affordable alternative to track-mounted partitions and will not require HVAC or building code permits for installation.

MADE IN THE USA | FREE SHIPPING

Our premium room dividers are hand-built to your customizations and shipped directly from our Minneapolis headquarters, ensuring quick turnaround.

COMPLETELY CUSTOMIZABLE

We build according to your specifications and offer a variety of heights, widths, and fabric color options to perfectly fit your situation.

ACOUSTICALLY SUPERIOR

Dampen room noise while dividing space. Our acoustical fabric panels offer enhanced sound control thanks to a fiberglass core construction.

SAFER, STURDIER BUILD QUALITY

Aircraft aluminum frames, low profile casters, and full-sized end panels provide greater support than outdated steel dividers on the market.

GUARANTEED CRAFTSMANSHIP

We guarantee you won't find a better-built room divider. We stand by our premium partitions and offer a 3-Year Warranty with optional extension options.

VERSARE

GREAT WALL ... OF VERSARE

It's not one of the (New) Seven Wonders, but you'll still wonder at the sheer size of the Operable Wall Folding Room Divider. At 3 heights of up to 12' and lengths of up to 19'2", this wall-mounted, floor-based, articulating partition covers large expanses. Choose from our Sliding version to keep all panels in a straight line, or for greater flexibility, our Folding version's panels can rotate to accommodate a variety of arrangements!

Combine to Operable Walls and divide a space of up to 39'. Forget those old track-mounted accordion doors; the Operable Wall is a more affordable and attractive alternative for your classroom or commercial space. Because of its unique sliding hinge design, this partition is a breeze to open and close. The flexible hinges also allow for slight vertical movement of each panel, which allows the divider to remain stable and slide across uneven flooring. Durable, rolling casters provide 2.5" of ground clearance, while a full-sized end panel (on each unit of four panels or more) provides added stability.

Each of the Operable Wall's acoustical fabric panels is 2" thick, making the Operable Wall perfect for dampening sound while controlling space. To maximize durability, the panels are framed in clear anodized aluminum. Choose from 18 stylish colors, all in pushpin-accepting acoustical fabric. The Operable Wall is sure to do the tough job of dividing your space while remaining sleek and modern.

- ✓ Affordable Alternative to Accordion Doors
- ✓ Easy-to-Use Sliding or Folding hinge options
